

Mission Statement

San Francisco Senior and Disability Action mobilizes and educates seniors and people with disabilities to fight for individual rights and social justice. Through individual support and collective action, we work together to create a city and world in which seniors and people with disabilities can live well and safely.

Senior and Disability Action was formed by the joining of Senior Action Network (SAN) and Planning for Elders in the Central City (PECC), with a history of working with seniors and people with disabilities for more than 40 years combined.

Senior & Disability Action can make your voice be HEARD!

Seniors and people with disabilities are advocating together to design and demand solutions to critical issues in SF. We spearhead legislation, forge coalitions, orchestrate public demonstrations, change policy and educate others.

Consumer Rights for Community Living (CRCL)

CRCL (pronounced “crackle”) helps seniors and people with disabilities navigate the complex web of home and community-based support services to keep people living at home. We work with people to get the services they need, know their rights, and resolve grievances.

SDA University and Survival School

Through these two programs, we empower seniors to take action in their communities. Through presentations, discussions, and popular education, we train seniors and people with disabilities to access vital community resources and to exercise their rights. We educate people on community organizing and on issues such as Social Security, health care, housing, and pedestrian safety.

HealthCare Action Team (HAT)

We advocate for homecare services, affordable supportive housing, and improvements to discharge planning, using theater, song, storytelling and other tools to raise awareness of healthcare needs.

Housing Collaborative

Join our group of tenants, homeowners, community advocates, and non-profit representatives, organizing together to preserve and create quality, affordable, accessible housing for seniors and people with disabilities.

Free Computer Classes

Beginning and intermediate classes teach seniors and people with disabilities how to use a personal computer, from finding the power switch to word processing, internet, and social media.
